Erosion and Sediment Control Guide for Land Disturbing Activities in the Auckland Region

Guideline Document 2016/005

The *Erosion and Sediment Control Guide for Land Disturbing Activities in the Auckland Region* Guideline Document, known as GD2016/005, is intended for a wide audience associated with construction, operation and maintenance ESC measures as part of earthworks and other land disturbing activities at multiple scales. The production of this document has included numerous reviews and the collation of feedback from within Auckland Council as well as industry representatives. However we also value your feedback. If you have any specific comments regarding this guideline document, please use this form to record it and email to esc@aucklandcouncil.govt.nz

We would appreciate feedback to be supplied by providing specific comments in the same format as the example response below (i.e. alternative passages of text are preferred over generalised statements). Your suggested improvements will be collated and reviewed. Reviews of this guideline document will be undertaken periodically or on an urgent basis if deemed necessary.

Please ensure that your details are provided with this form so that we can contact you to discuss your suggestion/s.

Name: _____ **Organisation:** _____ **Phone:** _____ **Email:** _____

Please state your role or interest in ESC implementation:

resident / developer / community group member / consultant / contractor / government staff / other (please state):

Section Reference	Section Title	Comment	Suggested Alternative Text	Justification for this Amendment
F1.1.1	Primary spillway	The primary spillway for smaller contributing catchments is restricted to 150 mm upstand only	"Up to 1.5 ha, use a 150 mm (minimum) upstand as a primary spillway"	Minimum diameter does not preclude the use of a concrete manhole riser as a primary spillway.
